ACADEMIC

UNIVERSITY OF SAN AGUSTIN

Iloilo, Philippines

B.S. in Computer Science

2025-Present

Relevant Coursework: Computer Programming I & II, Introduction to Computer Science, Discrete Mathematics, Discrete Structures, Mathematics in the Modern World, Living in the IT Era.

EXPERIENCE

ATLAS CAPTURE

April 2026 - Present

Current Data Labeler & Video Annotator

- Maintained exceptional attention to detail while reviewing, analyzing, and labeling complex multi-modal data sequences.
- Demonstrated high patience and accuracy metrics over long periods, ensuring high-quality outputs for project requirements.
- Analyzed structural processes and patterns, a skill directly transferable to breaking down complex English language rules for learners.

PROJECTS

SAN AGUSTIN CLINIC PORTAL (FINAL PROJECT)

May 2026

NEXT.JS, C++17, POSTGRESQL, PRISMA, TYPESCRIPT, TAILWIND

FULL STACK DEVELOPER

- Built a full-stack clinic management system with role-based dashboards for students to book appointments and admins to manage logs.
- Integrated native C++17 components to process file-based data operations, implementing object-oriented polymorphism and manual memory management.
- Integrated native C++17 components to process file-based data operations, implementing object-oriented polymorphism and manual memory management.
- Implemented secure user authentication using NextAuth v5, supporting credentials login and Google OAuth restricted to institutional domains.

RAGBOT (DEV DASH HACKATHON)

May 2026

NEXT.JS, REACT, TYPESCRIPT, TAILWIND CSS, RADIX UI, CLERK, PNPM

FRONT-END ENGINEER

- Built a responsive front-end dashboard for a localized disaster management system, featuring task tracking and readiness metric scores.
- Developed user interface systems utilizing Tailwind CSS 4 and Radix UI primitives to ensure fully accessible, touch-friendly mobile layouts.
- Implemented client-side interfaces for a streaming RAG-powered chatbot, facilitating real-time context-aware responses during emergencies.
- Integrated role-based views using Clerk authentication to separate administrative controls for officials from resident features.

PERSONAL PORTFOLIO

March 2026

NEXT.JS, REACT, TYPESCRIPT, TAILWIND CSS, PNPM, GIT

- Built a personal blog and portfolio site using Next.js and TypeScript with a Neo-Brutalist UI.
- Created a Markdown system that loads and renders blog entries dynamically from text files.
- Wrote a custom layout with a sticky desktop topbar and an ergonomic bottom navigation menu for mobile screens.
